So many doing so much good!
Many young people in the Adventist Church will abound in good works Halloween Night. Theirs is not the "Trick or Treat" way. They will be soliciting food for the unfortunate., giving away Christian literature.

It is the opinion of many that the "Trick or Treat" idea is but a forerunner of most of the riots, roguery and crimes of these times. Would'nt it be better if all would think of others and try Christ's way of going about doing good?

A LIVE WEEKLY NEWSPAPER AT HISTORIC APPOMATTOX COURT HOUSE VIRGINIA

VOLUME 9 NUMBER 44 APPOMATTOX, VIRGINIA, THURSDAY NOVEMBER 2, 1961 Subscription Rate: $2 per year

Father Darkleaf

by c. h. r.

Next Tuesday, November 7, is the election day in Virginia. We elect a governor, lieut. governor, attorney general, and the whole House of Delegates. The polls open at 6 A. M., and close at 7 P. M.

There will be two ballots. The election ballot will be sent to all voters, but there will be a special ballot for the three members for the 23rd District, Robert E. Lee Soil Conservation District.

While the crew of gas pipeline are doing their families arriving in Appomattox, we note that many businesses are opening a bit earlier and remaining open a bit later. Economics tries to give service: we want your business! We mulled several places to eat this A. M. And most of them are planning on remaining open Friday nights through the week. Ah yes, if you succeed, you "get the ball!" and Appomattox to succeed!

The "leaf raking" is going to be over, be done. The leaves have fallen. Jack Frost, and are falling by the place.

We don't come out too badly on the subject. One never knows what to expect. A bit of soap on the windows — but worst of all, a case of false fire alarms in the wee hours of morning. That was the other side. Our volunteer fire department fellows, doing a fine public service. False alarms are "out of bounds."

State Election Next Tuesday

With the general election coming up next Tuesday, Nov 7., Senator Chas T. Moses issued the following appeal to voters this week:

"Dear Friends and voters:

Nov. 7th general election day can have a lot to do with whether you pay more state taxes.

You all, and all the officers of Appomattox County whose names are signed below, joined with other Democrats of Virginia in the July primary and nominated:

"Albertis S. Harrison for Governor. The Governor is the one who can recommend new taxes, or higher taxes, and if he does not do either, the legislature passes a new tax, or increased tax, He is the man that has to sign the bill before it becomes law. Out of todays state taxes, except gas, car and truck licenses, the greater part of every dollar goes to schools and welfare costs. If the voters take a part in the final election of the Democratic primary nominees, you are taking a part in helping to select the state officers that will run your state government for the next 4 years,

Senator Mills, E. Godwin was nominated for Lt. Governor, He is very close to the Governor, He can have much influence with the Governor.

"Robert Y. Button, for Attorney General, the one who sees that state laws are properly enforced.

Dr. W. A. Pennington for House of Delegates.

The county officers in Appomattox believe that they the voter should, and would appreciate it if all voters, went to the polls on Tuesday, Nov 7, and voted for the Democratic nominees mentioned above." Chas. T. Moses.

KNOW THE WEATHER

By E. H. SIMS

What is fog? It is really a cloud on the surface of the earth!

Yes, fog is nothing more than a cloud. All clouds are formed when some kind of cooling process lowers the moisture capacity of the air to the point where moisture capacity becomes visible particles— thus a cloud.

This process can occur in several different ways, and under different circumstances. In the fall (the fog is seen most often in most parts of the country (the west coast experiences much fog in winter), fogs are usually caused, when the earth (heated during the summer) loses its heat into the cooler night air.

As the warmer air from the earth's surface rise and is cooled, fogs forms. Cold ground, in Spring, for example, can make its own fog when warm moist air blows over it — by cooling the air to the cloud stage.

Fog, then, is nothing more than a land-locked cloud.
